Animals including humans	<u>Rocks</u>	<u>Plants</u>

- Identify that humans and some other animals have skeletons and muscles for support, protection and movement
- Compare, contrast and classify skeletons of different animals
- identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food, they get nutrition from what they eat

Forces & Magnets

- compare how things move on different surfaces
- notice that some forces need contact between 2 objects, but magnetic forces can act at a distance
- observe how magnets attract or repel each other and attract some materials and not others
- compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials
- describe magnets as having 2 poles
- predict whether 2 magnets will attract or repel each other, depending on which poles are facing. Famous Scientist – Andre Marie Ampere – Electro Magnetism

- compare and group together different kinds of rocks on the basis of their appearance and simple physical properties.
- describe in simple terms how fossils are formed when things that have lived are trapped within rock

recognise that soils are made from rocks and organic matter

- identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers
- explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant
- investigate the way in which water is transported within plants
- explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.

Light

- Recognise that they need light in order to see things and that dark is the absence of light - notice that light is reflected from surfaces
- recognise that light from the sun can be dangerous and that there are ways to protect their eyes recognise that shadows are formed when the light from a light source is blocked by a solid object find patterns in the way that the size of shadows change.

History	History	History
A study tracing how an aspect of national history is reflected in the locality. A significant turning point in British history, The construction of the canals and the Anderton Boat Lift.	Changes in Britain from the Stone Age to the Iron Age. A study on the achievements of the earliest civilizations - Stone age to Iron age.	A study on the achievements of the earliest civilizations – an overview of where and when the first civilizations appeared and a depth study of Ancient Egypt.
Geography	Geography	Geography
Name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time. Understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom. Describe and understand key aspects of physical geography: rivers and the water cycle, and human geography. Use maps, atlases, globes and digital/computer mapping to locate.	Name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time. Understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom. Describe and understand key aspects of physical geography: rivers and human geography: types of settlement, land use, economic activity including trade links.	ocate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities. Describe and understand key aspects of physical geography: rivers and human geography: land use, economic activity including trade links and the distribution of food. Use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied. Use the eight points of a compass, four, symbols and key (including the use of Ordnance Survey maps)
countries and describe features studied. Use the eight points of a compass, four, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world. Use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.
