

## CleanAir@School

Announcement from our junior safety officers, Bradley, Lewis and Akira in year 6. They want the air around school to be as clean as possible and would like you to know about engine idling.

Engine idling is anytime a car engine is running but you're not moving. For example, waiting outside school or at a red light with your engine running. This is to protect our environment and improve our health. Become an eco-warrior and turn your engine off.

# World Car Free Day

Sunday 22<sup>nd</sup> September

In support of this, next week you could try walking, scooting or cycling to school if you can.
